MyArteLab – Web App Test Findings

Date: Feb 15, 2026

Environment: Web App (Client & Creator accounts)

A. CLIENT ACCOUNT

1. Wallet Balance Incorrect

Issue:

Wallet balance appears inflated.

Observed Transaction:

"Post-migration balance adjustment (Verified Solana USDC)"

Feb 13, 2026

–$9.23

Problem:

Displayed balance does not match the expected amount.

Action Needed:

Please verify balance calculation logic and migration adjustment handling.

---

2. Project Flow – Missing Acceptance Step

Flow Tested:

Client listed project → Creator applied → Client notified.

Expected:

- Accept / Decline option

- "Proceed to Payment" after acceptance

Current:

Acceptance step not available.

Impact:

Unable to test escrow flow end-to-end.

---

3. No Client–Creator Messaging

After project acceptance, no communication channel is available.

Missing:

- Messaging

- Ability to share location

- Contact details

- Deliverables clarification

Impact:

Cannot complete booking coordination.

B. CREATOR ACCOUNT

4. Previous Test Deposit Not Reflected

Balance remains $0.

Issue:

Test transaction not reflected.

Please confirm:

- Was the transaction successful on the backend?

- Is wallet sync delayed?

---

5. Transaction History Incorrect

Under "Recent Transactions":

- Old transaction visible with incorrect date

Needs validation.

---

6. Notifications

Creators should receive notification when a client accepts or declines a project and deposit made.

Also:

Accepted projects automatically reflect under "Bookings"

C. GENERAL

7. Help & Support

Should FAQ questions be expandable (click to reveal answers)?

---

8. Wallet Asset Display

Currently showing two USDC assets.

Should:

- Remove duplicate?

- Or diversify supported assets?

Needs clarification.

D. Gas Wallet Funding – Clarification Needed

When is gas wallet funding required?.
